KIRRHOSOFT

Organization Information

Company Name	KIRRHOSOFT
Established	15 May, 2023
Address	House-01, Road-04, Banani (DOHS), Dhaka-1206, Bangladesh
Mobile	+8801301-036959
E-mail Address	info@kirrhosoft.com
Website	www.kirrhosoft.com
Type of Company	Kirrhosoft is a private software solution provider company
Motto	Grow Beyond Expectations with Kirrhosoft

Our Mission & Vision

Mission

To design and deliver high-quality business process automation software that replaces manual work with reliable, scalable digital solutions, helping organizations operate faster, smarter, and with confidence.

Vision

To be a globally trusted software partner that empowers organizations worldwide to build a streamlined, digital-first future through automation and user-friendly solutions.

Goals

Within the next 3–5 years, we aim to become a globally recognized provider of business automation software, helping organizations across industries replace manual work with secure, scalable digital solutions that improve efficiency, accuracy, and overall operational performance worldwide.

Who are We?

At Kirrhosoft, we blend international experience with local passion to build software that meets the highest global standards. Founded by a veteran engineer, our company is driven by a commitment to quality, precision, and innovation. We design with intention, test rigorously, and deliver solutions that are scalable, secure, and built to last. Our team is dedicated to crafting impactful software that empowers businesses—here in Bangladesh and beyond.

KIRRHOSOFT

Our Core Services

MVP DEVELOPMENT

We build a streamlined version of your product with only the core features, helping you launch faster, reduce costs, and validate your idea with real users. This allows you to test market demand and refine the product before full-scale development.

STAFF AUGMENTATION

We provide skilled professionals who seamlessly join your in-house team, helping you fill talent gaps, scale quickly, and accelerate project delivery. Our flexible model ensures quick onboarding, smooth collaboration, and the right expertise when you need it.

WEB APP DEVELOPMENT

We design and develop custom web applications tailored to your business needs, ensuring scalability, performance, and security. Our team delivers intuitive, responsive, and feature-rich apps that enhance user experience and drive growth across web and mobile platforms.

Our Core Services

MOBILE APP DEVELOPMENT

We create high-performance mobile applications for iOS and Android, delivering intuitive, user-friendly, and feature-rich experiences. Our solutions help businesses engage users, streamline processes, and drive growth, ensuring apps are scalable, secure, and tailored to your goals.

SOFTWARE MAINTENANCE

We provide comprehensive software maintenance to ensure your applications remain reliable, secure, and up-to-date. Our services include bug fixes, performance optimization, updates, and feature enhancements, helping your software run smoothly, adapt to changing needs, and deliver consistent value.

CODE OPTIMIZATION

We enhance your software's performance, efficiency, and scalability through expert code optimization. By refactoring, reducing complexity, and improving resource usage, we ensure your applications run faster, consume less memory, and deliver a smoother, more reliable user experience.

Our Core Services

UI/UX DESIGN

We craft intuitive and engaging user interfaces that enhance the overall user experience. Our UI/UX design services focus on usability, accessibility, and visual appeal, ensuring your applications are easy to navigate, visually striking, and user-centric.

IT CONSULTING

We provide strategic IT consulting to help businesses leverage technology effectively. Our experts offer guidance on infrastructure, software solutions, and digital transformation, enabling organizations to optimize operations, reduce costs, and achieve long-term growth through smart technology decisions.

Problems We Solved (Recruitment Agency Management System)

Challenges:

The agency struggled to manage candidates, track passport movements, and monitor each candidate's stage in different projects. Their access control was limited, and there was no reliable way to trace user actions, leading to confusion and accountability issues.

Solutions:

We developed a fully integrated recruitment management system that centralizes all candidate records and project workflows. Passport tracking became seamless through a dedicated bin management feature, ensuring the agency always knows the exact status and location of every passport. We implemented both RBAC and ABAC models to give admins fine-grained control over user permissions, keeping data secure and access organized. In addition, detailed audit logs were added to track every action, giving the admin full traceability and accountability across the entire system.

KIRRHOFT

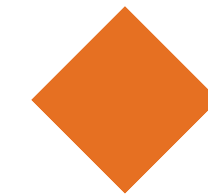

Problems We Solved

(Legal Consultancy Management System)

Challenges:

The client needed a secure digital platform for booking legal consultations, managing consultant applications, and handling in-app payments. They also required a reliable way to track user actions and enable remote, face-to-face legal meetings without physical presence.

Solutions:

We built a complete Legal Consultancy Management System where clients can buy in-app currency, book appointments, and meet consultants through integrated 1-on-1 video calls, removing the need for physical visits. Consultant onboarding is fully streamlined—associates apply through the system, and admins approve them using strong RBAC and ABAC permission controls. Audit logs provide full transparency, while features like consultant retention and referral options make the overall experience more flexible, efficient, and user-friendly.

KIRRHOSOFT

Problems We Solved (Factory Management System)

Challenges:

The factory relied on manual processes for inventory, orders, and invoicing, which caused frequent errors and delays. Tracking client balances was difficult, and they had no clear view of daily or monthly sales, revenue, or dues, making decision-making slow and uncertain.

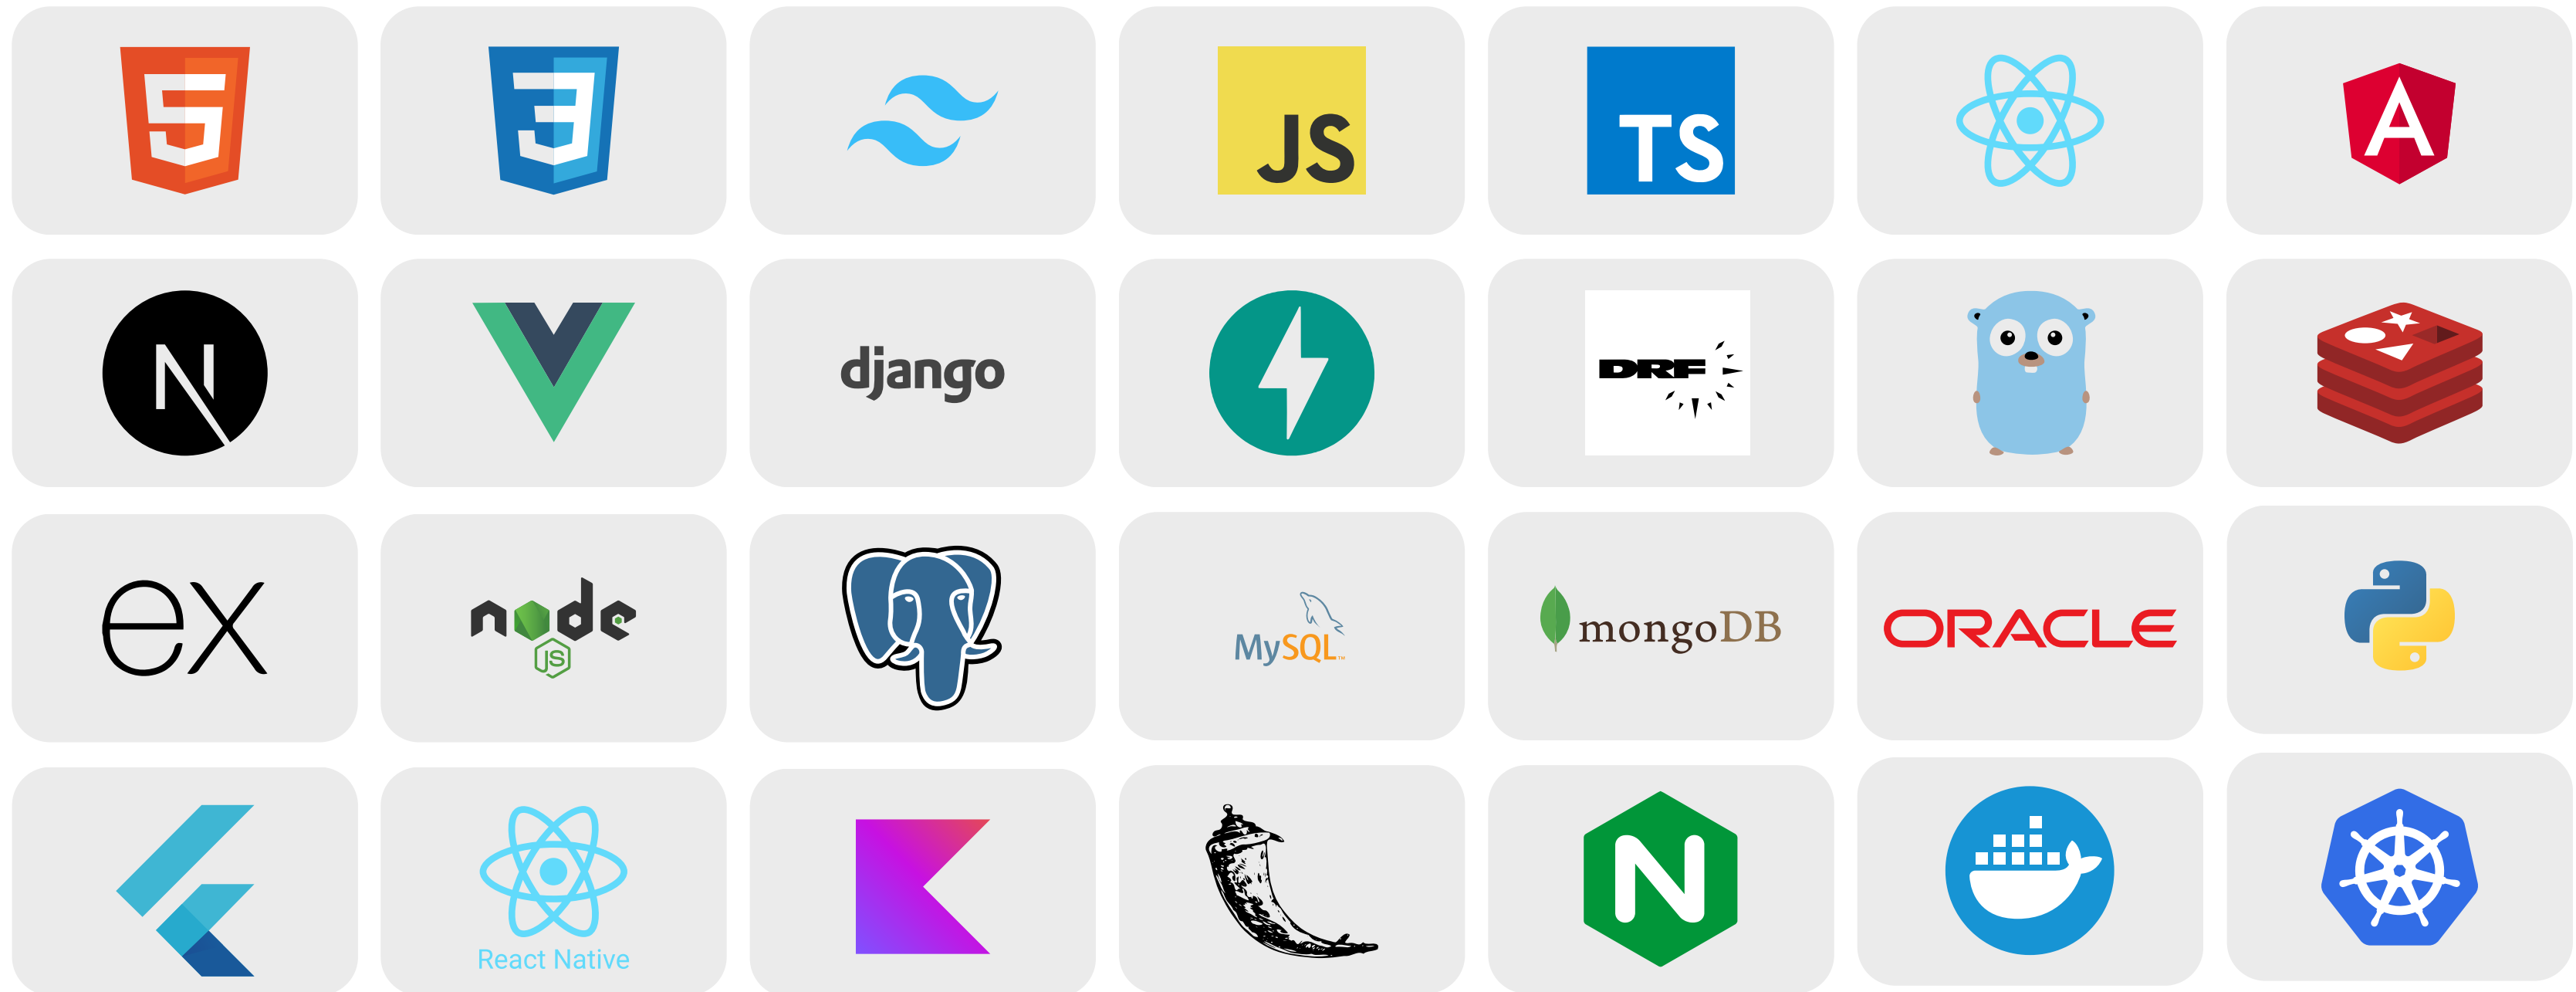

Solutions:

We built a complete software solution that streamlined all of their operations in one place. The system now manages inventory accurately, simplifies order placement, and automatically generates invoices for both single and multiple orders. Each client's balance and outstanding dues are tracked in real time, ensuring full financial transparency. To support smart decision-making, we created a dynamic dashboard that displays sales insights across any interval—daily, weekly, monthly, or yearly—giving them a clear picture of revenue, dues, and overall performance at a glance.

KIRRHOSOFT

Tech Stack We Use

KIRRHOSOFT

Why Team Up with Us?

We are an engineering-driven team capable of building software of any scale, from simple applications to complex enterprise systems. Our focus on quality ensures that every product we deliver is robust, reliable, and built using industry-best practices. We write and run comprehensive tests to validate performance and stability, ensuring our solutions stand strong in real-world conditions.

In addition, our team works with high-end PCs equipped with the latest configurations, enabling faster development cycles and greater productivity. Our office is equipped with a full backup power system, making interruptions extremely unlikely and ensuring smooth, continuous workflow. With us, you get a dependable team committed to delivering exceptional results—every time.
